Details

Programme Overview	Fulfil your ambitions to study a degree in business, management or hospitality Study a focused, intensive programme designed to provide you with the foundational academic, commercial, and professional literacy required for immediate success, with your choice of one of the two connected full degree programmes: BA (Hons) Business Entrepreneurship and Management (BEM) or BA (Hons) Hospitality and Event Management (HEM). The four foundation modules are designed to develop your skills, your knowledge and your understanding of contemporary business progressively from theoretical principles in your first term 1, through applied digital practices in term 2, to a strategic capstone project that culminates in term 3. In parallel, throughout the year, you will develop academic and professional skills and gain the confidence to succeed. Supported to succeed: Transition effectively into higher-level study through our bespoke, supportive foundation year, which helps you develop the skills you need to succeed. Action at the Core: Participate in the Venture Creation Hub to develop your own business idea from concept to an investment-ready plan or work with an existing SMME to shape their action plan for growth. Strategic Simulation: Step into the shoes of a director in our Boardroom Simulations and consultancy games, making high-stakes strategic decisions in real-time. Data-Driven Leadership: Learn to harness big data and AI to inform strategy in modules like The Future of Work and Smart Operations and Digital Ecosystems. Responsible Innovation: Modules such as Fundamentals of Business Law and Ethics equip you to lead ethically in a social justice and climate-conscious world. Integrated Employability: A dedicated "Professional Portfolio" thread runs through every level (Self-Made, Digital Marketing: Strategy and Practice, and The Future of Work), ensuring you graduate with honed skills and a roadmap for success culminating in a critical appraisal and application of management theory. The programme is aimed
--------------------	---

	at individuals seeking to drive innovation and lead change in business across sectors. It aims to develop well rounded business graduates able to innovate and to lead transformational change. You will also be able to identify market opportunities; embrace new ideas, new ways of working and new ways of doing business, as well as, leverage the potential of evolving and emerging technologies and exploit strategic insights. The vision behind the programme is to create graduates with an entrepreneurial mindset, able to take the spark of an idea, test it, develop it and make it into a sound business proposition – and then to lead delivery – be it a strategic change within an existing company or branching out in their own start-up. As a graduate, you will have a thorough grounding in business management theory and practice as well as an understanding of the drivers shaping business, including technology, ethics, sustainability and social responsibility, alongside the impacts of wider political and economic factors. You will have the flexibility and resilience to adapt effectively to change as well as to lead change. You will have the human capital to work with, lead and inspire others while supporting them on their journeys of change.

Employability

Academic progression	Graduates will be well prepared to progress to postgraduate
----------------------	---

opportunities	study in business, management, entrepreneurship and related disciplines. The programme progressively develops the academic, research, analytical and professional capabilities required for further study, while Level 6 learning in consultancy, strategic leadership, digital innovation and applied research provides a strong foundation for progression to Master's-level programmes, including strategic business management, entrepreneurship, innovation and related fields.
Career progression opportunities	Career progression opportunities The programme prepares graduates for diverse career pathways across business, management and entrepreneurship, including progression into management and leadership roles, consultancy, business development, operations, digital business and innovation, as well as self-employment and venture creation. Entrepreneurial capabilities, including opportunity recognition, creative problem-solving, adaptability, initiative, evidence-informed decision-making and the ability to create value under conditions of uncertainty, are developed as transferable skills for work, enabling graduates to build businesses, progress within organisations and lead innovation and change.

Programme Structure

Structural model	
Type	Linear
Description	

Structure Notes	The programme is delivered via a standard 480-credit framework Each level comprises 120 credits, delivered as four 30-credit modules Three modules are delivered in 10-week blocks (Term 1, 2, or 3). One module per level is a "Longitudinal" module that runs across all 30 weeks to support longitudinal skills development.
